

Biodenta Guided Surgery Solution

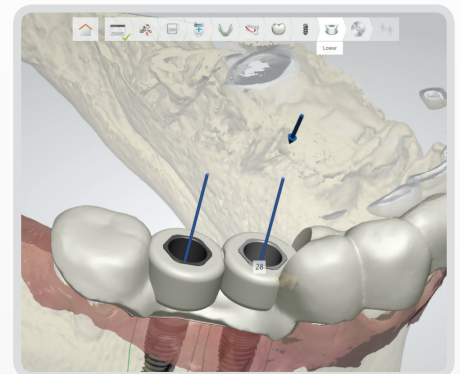

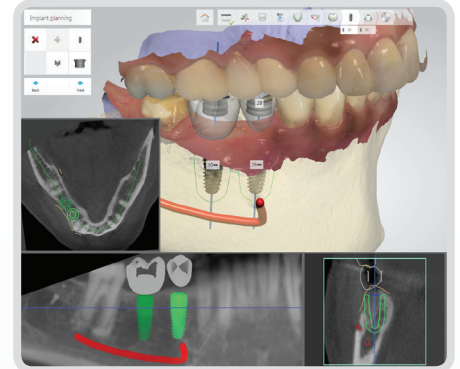

Guided Surgery, Predictable Outcomes in Implantology *BioGuide in General*

- Prosthetic driven planning
- Increasing efficiency and patient satisfaction
- Affordable for every single implant surgery
- Open and flexible fully digital workflow

BioGuide implant surgery system significantly improves clinical and esthetic results. This system increases overall efficiency and profitability by reducing chair time and number of patient visits. With the BioGuide system a low risk minimally invasive surgery is simply achievable which increases patient satisfaction by decreasing healing time and pain.

BioGuide's flexible fully digital workflow combined with prosthetic driven planning, enables labs and clinics to design patient-specific prosthetic parts prior to the surgery. In addition, its open structure enables in-house design and production of surgical guide and temporary restorations at the same time.

Open Software for Modern Dentistry *BioGuide by 3Shape Software*

- Open platform, flexible workflow
- Virtual wax-up, virtual tooth removal
- Integrated with digital impression & Dental System

Your Total Solution Provider
For more information connect with us

Biodenta has established its position within the dental field on the concept of the **Total Solution Provider**. This is a systems based approach to dentistry. Our two main product groups are **Dental Implant Systems (DIS)** and **Digital Dentistry Systems (DDS)**.

We believe that the future belongs to those who successfully can integrate these modules in a smart and efficient way. Our mission is to help clinicians to do this through advancements in products, workflows, and clinical procedures.
